

## Objective

To deliver high levels of capital growth in excess of the Consumer Prices Index over the recommended minimum time horizon of 10+ years.

The Fund will seek to achieve its objective by investing at least 70% in collective investment vehicles, a greater proportion of which will be allocated to growth assets (such as equities) than to defensive assets (such as fixed interest and cash).

## Asset Allocation

## Investor Profile

You would like to have the opportunity for returns well in excess of inflation, and you are prepared to accept high levels of volatility and the possibility of significant short term losses to achieve this.

Your portfolio will typically be invested almost exclusively in growth assets (up to a maximum of 100%), with only very low levels of defensive investments (such as fixed interest and cash).
